

When To Wash

This is a game you can do with the children to learn and talk about hand washing and preventing germs. Attach this sheet to the inside of a file folder. Cut out the game pieces on the next page (you will see little trim marks to assist you). Add fun tack or Velco to this sheet and game pieces if desired.

To play the game: Place the picture of the items(s) that best fit the statement in the square. There are extra pictures and there are several correct answers for some of these squares. Answers are on page 3.

<p>These 2 things are the dirtiest!</p>	<p>164 million missed each year.</p>	<p>What cleans hands the best?</p>
<p>Sing this song twice to make sure your hands are clean.</p>	<p>Reproduces every 20 minutes!</p>	<p>Germs biggest enemy!</p>
<p>Which has the most germs? (Place the X next to it).</p>  	<p>The bacteria in your body is greater than . . .</p>	<p>You should wash your hands when:</p>

Game Pieces

Cut out pictures below. Small trim marks show you where to cut.

Soap

Washing Hands

Bleach

Before Eating

Cooking

Toothbrush

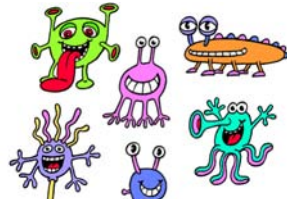

Happy Birthday

Toilet

Playing with Pets

Germs

Liquid Soap

Dirty Hands

School Days

When you're sick

Sink

Change A Diaper

All people in USA

Answers

There are several correct answers for some of these squares.

Place the picture of the item(s) that best fit the statement in the square. There are extra pictures.

These 2 things are the dirtiest!

Sink

Dirty Hands

164 million missed each year.
